

Collaborative Platform for Data Management

Data quality is the most critical part of chemical compliance management, with CDP, Lisam offers the first-ever collaborative platform expressly designed to facilitate data collection and input tracking.

With its advanced functionalities and user-friendly interface, CDP helps organize, update and monitor regulatory data. By centralizing your data in a single place on CDP, be sure to enhance time efficiency and data quality.

Availability

CDP gives instant access to all your regulatory data through an intuitive and dynamic interface. Get the latest information and available data in real time through your customizable dashboard!

Consistency

Thanks to its advanced field options and predefined validation rules, CDP ensures your data is managed in the easiest and most consistent way possible to increase accuracy.

Quality

Data discrepancies and lack of accuracy can seriously endanger your business, CDP was built to ensure the highest data quality by enabling collaboration, source management and tracking of changes.

Connectivity

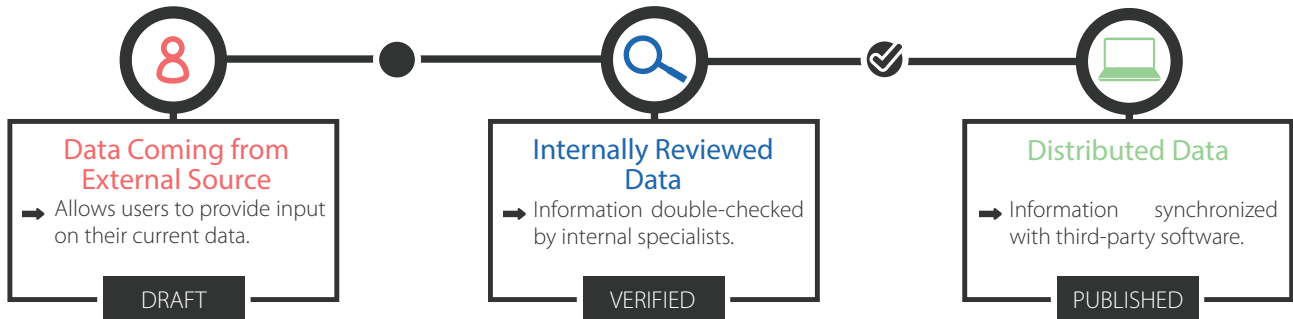

The data stored in CDP can be easily integrated with third-parties through an API. This allows you to utilize your data in any other system such as your SDS Authoring tool.

CDP Key Features

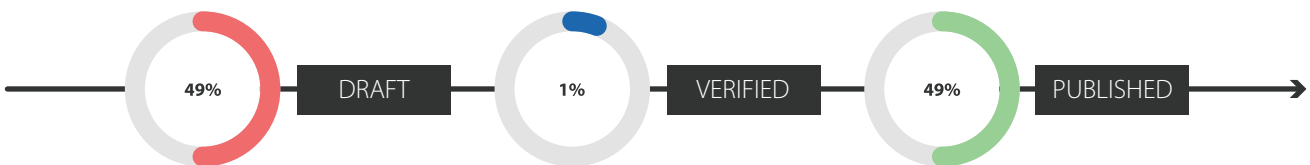

- ✓ Change History
- ✓ Secure Data Storage
- ✓ Data Validation Workflow
- ✓ Up-to-Date Regulatory Lists
- ✓ Advanced Dashboard Function
- ✓ Wide -Ranging Permission Options

Data Validation Process

CDP has a workflow feature designed to control data management. This will allow your teams to review the external or crowdsourced data and stay clear of errors and inaccuracies.

CDP also provides real-time statistics based on the implemented workflow for an immediate data quality check.

Your data is stored in an IP-protected environment only accessible to you or your co-workers with the level of permission you decide to give!

Modification Warnings

Batch Import/Export of Data

Messaging Tool

Data Retrievable via WebServices

With CDP, aim towards reaching the highest-level of quality and discover a brand-new way of managing data.
